

Incipient & Interior Structural Fire Brigade Member

40 HOURS

DESCRIPTION

This 40 hour course is designed to meet the standards outlined in the (NFPA) National Fire Protection Association 1081 Standard for *Industrial Fire Brigade Member Professional Qualifications* (2012 Edition) Chapters 5 and 7.

This course is designed to train industrial workers to safely and competently respond to and mitigate both incipient level and interior fires and to work as a member of an organized industrial emergency response fire team.

This course will provide a base of knowledge that meets the minimum standard as set forth in NFPA 1081. It is highly recommended that each new brigade member continue to train and build their knowledge base so they can fulfill their role on the industrial fire brigade in a safe and knowledgeable manner.

***This is a Pro Board Certification class. It is delivered in conjunction with the Alabama State Fire College.**

PHYSICAL REQUIREMENTS

By submitting your application you are affirming that you understand this is a physically demanding course and have no known medical or health issues that will affect your participation during this training program. It is recommended that you have a physical prior to any physically demanding course conducted at GCERA.
